Subject: RE: Star-of-Bethlehem (*Ornithogalum umbellatum* subsp. *campestre*)

Dear Charles,

The photographs are of Cornish Rampion-fumitory which is growing next to the lime kiln in West Portholland. It is endemic to Cornwall and the Isles of Scilly and so is a very rare plant in global terms. It is a plant of disturbed soil and waste places and used to be frequent in horticultural and arable fields, although is becoming increasingly rare in cultivated fields.

Best wishes,

Colin
